The Creative Spirit: 19th-Century Technology and the Transformation of America

What: The period from 1830 to 1900 saw a dramatic increase in creative technological advances. The railroad, telegraph, sewing machine and various technologies all radically changed the lives of people and transformed the political, economic, and social development of the American nation. This hands-on workshop will immerse participants in primary-source images and text documents that chart this 19th-Century boom, with focus on deeper, integrated learning in the arts, humanities, and sciences.

When: Thursday, October 19, 2017 8:30-3:30 PM

Where: Hosted by the American Antiquarian Society
Goddard-Daniels House
(directly across the street from library)
190 Salisbury Street, Worcester, Massachusetts 01609
Parking is available in the Society's lot at 90 Park Ave.

Cost: **Early Bird – Before September 28, 2017**
